

PIONEER
94-103 CRM

FIELD PROVEN. YIELD PROVEN.

- All-around proven leader hybrid with consistent performance across environments along with best-in-class agronomic traits.
- Broadly adapted for versatile placement.
- Great fit for growers who want to harvest early or where dry grain moisture is a must.
- Very good stalk integrity, but still needs to be an early harvest candidate based on maturity.
- Available as Conventional, AM

- Solid agronomic package coupled with high-yield potential. (White Cob)
- Strong brittle snap tolerance with good root strength.
- Very good staygreen and late-season plant intactness.
- Consistent emergence in varying soil types.
- Available as Qrome, PowerCore (NEW) and Vorceed (NEW)

- Optimum AQUAmax Hybrid. Exceptional drought tolerance while delivering top-end yield in optimal growing conditions.
- Very good root strength and mid-season brittle snap tolerance.
- Strong Late season stalk strength and staygreen.
- Available as AM, Qrome.

- Strong late plant health and tar spot tolerance with solid agronomics.
- Widely adapted hybrid placement with good stalk strength, mid-season brittle tolerance and root strength.
- Available as PowerCore.

- Leader hybrid delivers a combination of top-end yield performance and strong agronomics.
- Adapted for a wide variety of environments with good stability.
- Above average root strength, mid-season brittle snap tolerance and late season stalk strength.
- Available as Conventional, AM, Qrome, PowerCore (NEW), Vorceed (NEW).

- Extremely well-rounded combination of industry leading yield and agronomics including very good tar spot tolerance. (White Cob)
- Compact plant stature.
- Available as AM.

- Extremely well-rounded combination of industry leading yield and agronomics including very good tar spot tolerance.
- Compact plant stature a benefit to tolerate wind events.
- Available as AM.

- Proven, consistent leader with outstanding yield potential with solid overall agronomics.
- Optimum AQUAmax hybrid offering improved performance in water limited conditions.
- Very versatile placement, can really go anywhere like the P0589 platform.
- Excellent late season stay green with strong late season stalks and plant health.
- Available as Qrome.

- PowerCore® Enlist® hybrid that brings yield, dependable above ground insect protection and flexibility in herbicide choices.
- Impressive yield potential, with good all-around agronomics and a solid disease package
- Available as PowerCore.

PIONEER
104-108 CRM

FIELD PROVEN. YIELD PROVEN.

- Versatile, leader hybrid with strong drought tolerance bringing yield stability paired with solid agronomics.
- Strong performance across multiple environments. High yields at a desirable maturity for southern Minnesota.
- Above average brittle tolerance and strong root strength.
- Available as AM, Qrome.

- New hybrid with industry-leading tar spot tolerance.
- Solid overall agronomics including very good root strength.
- Good late-season stalks and plant intactness.
- Available in Qrome.

- High yield potential product with solid agronomics.
- Good mid-season brittle snap tolerance.
- Very good disease package with above average Tar Spot and Northern Corn Leaf Blight tolerance.
- Available in Qrome.

- Performance leader hybrid with strong yield potential.
- Solid all-around agronomics including good root strength, brittle tolerance and late-season stalks.
- Excellent drought tolerance for versatility across acres.
- Available in Conventional, PowerCore Enlist and Vorceed Enlist.

- Leader hybrid with a strong agronomic package.
- Dependable all-around agronomics including good mid-season brittle tolerance and late season stalk strength.
- Moderate stature plant with lower ear height and strong root strength.
- Available in Vorceed Enlist.

- Proven, consistent leader with tremendous yield potential and strong agronomics.
- Optimum AQUAmax hybrid offering improved performance in water limited conditions.
- Go anywhere product, but highest yields on well-drained soils, highly productive acres.
- Late season staygreen and intactness are excellent.
- Available as Qrome.

- 108 CRM hybrid with impressive yield potential.
- Excellent drought tolerance provides consistent performance across a range of soil types.
- Good mid-season brittle stalk tolerance.
- Available in Qrome

- Versatile hybrid with strong performance across a range of yield levels with leadership potential in this zone.
- Good agronomics and a solid disease package.
- Very good mid-season brittle tolerance.
- Strong drought tolerance for moderate to tougher acres.
- Available as Vorceed Enlist.

- Versatile hybrid with high yield potential, solid agronomics, and stability across variable environments.
- Average plant and ear height with good disease package.
- Strong mid-season brittle tolerance.
- Excellent stalks and late season intactness.
- Available in AM.
